SUMMARY OF COURSES IN THE BACHELOR OF ECONOMICS IN AUDITING PROGRAM

YEAR: 2019

No	Course name	Description
Ι	Compulsory General Subjects	
1	Subject: ADVANCED MATH	Contents: The course provides students with
	Volume: 5 Credits	mathematical tools of differential, integral, matrix,
		determinant as the basis for application in calculation
		and analysis of econometric models.
2	Subject: PROBABILITY THEORY	Prerequisites: Advanced Maths
	Volume: 2 Credits	Contents: At the end of the course, students understand basic statistical methods, analyze statistical indicators applied in some quantitative subjects, and apply statistical methods for socio-economic analysis.
3	Subject: APPLIED STATISTICS	Prerequisites: Advanced Math, Probability statistics
	Volume : 3 credits	Contents: The cource provides a systematic way of
		theory and practical application of statistical
		investigation methods including the initial collection
		of information on socio-economic phenomena and
		the processing of the collected information. ; apply
		socio-economic analysis methods as a basis for
		predicting future levels of phenomena in order to
		help decisions in economic management.
4	Subject: MARXIST-LENINIST	Contents:
	PHILOSOPHY	The course provides students the knowledge of
	Volume : 3 credits	worldview and methodology of dialectical
		materialism and historical materialism of Marxist-
		Leninist Philosophy.
		Initially know how to apply the basic principles of the Marxist-Leninist Philosophy in analyzing and evaluating practical problems in life.

5	Subject: GENERAL THEORY OF	Contents: The course provides students with basic
	THE STATE AND LAW	knowledge about the State and the law, the legal
	Volume : 3 credits	system of Vietnam, types of legal documents of our
		state today as well as the issue of responsibility for
		implementing the law of Vietnam. citizens and
		handle violations. Thereby educating students in the
		sense of responsibility for obeying the laws of the
		Party and the State.
6	Subject: VIET NAM COMMUNIST	Contents:
	PARTY HISTORY	The course aims to equip students with awareness
	Volume: 02 credits	about: The role of the Communist Party of Vietnam
		in building and defending the country, experienced
		in leading the Vietnamese revolution through the
		periods. At the same time, it also provides an
		overview of essential changes in the Party's
		awareness and policies from 1986 onwards through
		the party congresses.
		These lessons are the basis for learners to strengthen
		their patriotism, national pride, and sense of
		responsibility in building confidence in the Party's
		leadership in the current integration context.
7	Subject: HO CHI MINH	Contents:
	IDEOLOGY	The course provides students the knowledge of Ho
	Vomlume: 02 credits	Chi Minh's thoughts on the nation and the national
		liberation revolution; socialism and the transition to
		socialism in Vietnam; great national unity,
		combining national strength with the strength of the
		times; Communist Party of Vietnam; on-building the
		state of the people, by the people, for the people;
		ethics, humanity and culture
8	MARXIST-LENINIST POLITICAL	Contents:
	ECONOMY	The course provides students :
	Volume: 02 credits	- The basic theories of Marxist-Leninist political
		economy, including: theory of commodity
		production, basic laws of the market; C. Marx's

		theory of surplus value; theory of monopoly
		capitalism and state monopoly.
		- The main contents of applying Marxist-Leninist
		doctrine in the period of building socialism in
		Vietnam: socialist-oriented market economy;
		ownership and interest relations; industrialization
		and modernization associated with the development
		of the knowledge economy and international
		integration.
9	Subject: SCIENTIFIC SOCIALISM	Contents:
	Volume: 02 credits	The course provides students the basic contents of
		scientific socialism, scientific theoretical principles
		to understand the historical mission of the working
		class, and the transition to socialism, the policy line
		of building socialism in Vietnam; explain and have
		the right attitude towards the road to socialism - the
		path that our Party and people have chosen.
10	Subject: MICROECONOMICS	Contents:
	Volume: 03 credits	The course provides students with basic theories and
		principles of microeconomics in a market economy
		with state regulation. Students can understand the
		behavior of businesses and individuals in production,
		business and consumption activities; and how to
		analyze and describe economic activities, apply
		statistical and econometric techniques, and theories
		to build economic models.
11	Subject: MACROECONOMICS	Prerequisites: Micro Economics
	Volume: 03 credits	Contents: The course provides students with basic
		theories and principles of macroeconomics in a
		market economy with government regulation.
		Students understand macroeconomic policy tools to
		regulate and stabilize the economy.
12	Subject: BASIC	Prerequisites: Students acquire basic knowledge of
	ADMINISTRATION	society and economics

	Volume: 3 Credits	Contents:
		Students understand the function and role of a
		manager, analyze the influence of factors in the
		endogenous and exogenous environments on the
		decision making of the administrator, how to plan
		and organize management and decision making.
		Students can apply these basic knowledge to some
		basic management areas such as human resource
		management, information management.
13	Subject: STRATEGIC	Contents: Introduction to strategic origins, concepts
	ADMINISTRATION	of strategy and strategic management as well as the
	Volume: 3 Credits	role, position and relationship of strategic
		management with other areas in the business
		activities of each organization. Meaning, role and
		application are vision, mission and goals of the
		enterprise.
		Analysis of the business environment, internal
		analysis of the business, competitive advantages to
		build the optimal business strategy for the business.
		Organize the implementation of the strategy to
		achieve high efficiency in management. Control
		activities in management, the contents to be checked
		and the adjustment activities after the inspection.
		Discover your own capabilities to be ready to
		become a successful strategic manager in the future.
	Compulsory physical education and	
	defense education subjects	
1	Subject: PHYSICAL EDUCATION	Content: Students understand the principles and
	Volume: 6 Credits	methods of exercising and sports and the effects of
		this practice on the development of the body;
		techniques and rules for certain sports such as middle
		distance running, volleyball, etc.
2	Subject: DEFENSE EDUCATION	Contents: Provide students with some basic
	Volume: 5 Credits	knowledge of a country's military line, basic military
		techniques and tactics, and the role of military

COMMUNICATION SCIENCE forms and means of communication in business. 3 Subject: GENERAL ANTHROPOLOGY GENERAL Content: The course provide students with knowledge to understand the science of human research, in terms of biology, culture and society; understand the relationship between anthropology and other sciences such as history, philosophy, religion, psychology; Understand the methods, theories, and research approaches of anthropology. Equip students with skills in anthropology. Equip students with skills in anthropology. 4 Subject: CULTURE Content: In addition to introducing some theoretical knowledge, methodologies, sociological research methods, etc, Subject also helps students understand that society is a rich system because it includes many complex issues. of modern society. Subject content consists of 14 chapters, briefly presenting the conditions and premise of the birth of sociology, the			politics in socio-economic development. of a
a sense of protecting national security. Optional Courses Subject: GENERAL PSYCHOLOGY Contents: The course provides knowledge about the concepts of cognitive activity, memory, emotional life, will action, personality, helping students understand the factors affecting human personality. Subject: INTRODUCTION TO COMMUNICATION SCIENCE Volume: 2 Credits Subject: GENERAL ANTHROPOLOGY Content: The course provide students with basic knowledge of forms and means of communication in business. Volume: 2 Credits Content: The course provide students with knowledge to understand the science of human research, in terms of biology, culture and society; understand the relationship between anthropology and other sciences such as history, philosophy, religion, psychology; Understand the methods, theories, and research approaches of anthropology. Equip students with skills in anthropology. 4 Subject: CULTURE Content: In addition to introducing some theoretical knowledge, methodologies, sociological research methods, etc., Subject also helps students understand that society is a rich system because it includes many complex issues. of modern society. Volume: 4 Credits	6	Subject: AUDIT THEORY	Content:
		Volume: 4 Credits	

		This module introduces the content form '
		This module introduces the content focusing on
		independent audit activities, audit of financial
		statements.
		The course focuses on auditing concepts, risk-
		oriented audit approaches. In addition, students are
		taught how to identify fraud and errors related to
		financial statements, assess audit risk and risk
		components from which auditors can take measures
		to handle risks, specific evidence-gathering
		techniques to ensure that the auditor can obtain
		sufficient appropriate evidence to issue a reasonable
		audit report. Subject introduces the process of
		performing an audit of financial statements, which
		consists of three (3) phases: Planning; perform;
		complete and prepare the audit report.
7	Subject: AUDIT 1	complete and prepare the audit report. Content:

8	Subject: AUDIT 2	Content:
	Volume: 3 Credits	The course includes knowledge related to concepts,
		in-depth auditing principles and applications to solve
		practical problems related to the organization of
		audit work. Subject continued to introduce audit
		procedures for processes: inventory and cost, and
		also covered in-depth issues in auditing such as:
		audit in computer environment, audit of accounting
		estimates. and solve common situations encountered
		in auditing practice.
9	Subject: INTERNAL AUDIT AND	Content: The course includes knowledge related to
	INTERNAL CONTROL	concepts, principles of internal control system
	Volume: 3 Credits	according to COSO 2013 and practical issues related
		to setting up internal control system. Subject also
		analyzes the target groups in the design and
		implementation of the internal control system, the
		principles when building the internal control system
		at specific processes. Subject also introduces the
		functions, scope and role of internal audit in the
		enterprise; and introduce internal audit procedures.
10	Subject: BUSINESS ETHICS AND	Content: The course not only provides appropriate
	CORPORATE GOVERNANCE	knowledge of professional ethics, but also provides
	Volume: 3 Credits	regulatory regimes, compliance requirements when
		performing accounting or auditing in companies.
		This section includes a professional overview,
		ethical decision-making, and corporate ethics.
		In addition, Part 2 of the Subject provides a core
		component of the knowledge and skills base on
		business administration systems. This section
		includes an overview of corporate governance, board
		and related issues, approach to corporate
		governance, corporate social responsibility (CSR)

11	Subject:	FINANCIAL	Prerequisite: Prerequisite: Financial accounting
	STATEMENT ANALY	SIS	1
	Volume: 3 Credits		Cpntent: The course includes knowledge related to
			financial statement analysis on three aspects:
			strategic analysis, accounting environment and
			financial analysis. Students will be grouped and
			researched on a number of companies in the market.
			Through Subject, students are trained in the skills of
			collecting, synthesizing and analyzing financial and
			non-financial information for management decision
			making.
12	Subject:	BUSINESS	Content:
	INFORMATION SYST	TEMS	Part I: Introduction to basic concepts such as
	Volume: 2 Credits		Organization, Enterprise, Business in the enterprise,
			Enterprise management system and especially the
			concept of ERP (Enterprise Resource Planning).
			Presenting the processes, stages and issues raised in
			building & implementing ERP systems, the role of
			ERP in supporting business administration. In this
			part, students have access to and practice on the ERP
			system which is considered to be the largest scale in
			the world today, SAP ERP with Dataset GBI version
			2.1 2011 package (this package contains enterprise
			Global Bike Incorporated model was built by SAP to
			serve ERP training for universities participating in
			the SAP UAP - University Alliances Program, of
			which the University of Economics and Law is a
			member).
			Part II: Presenting standard SAP ERP modules and
			key business processes are Accounting
			(Accounting), Sales (Fulfillment), Purchasing
			(Procurement). Presenting the integration of these
			processes in an ERP system through Master data,

		cross-functionality between processes to create a
		unified business system
13	Course: FINANCIAL	Prerequisites: Principles of financial markets
	MANAGEMENT (CORPORATE	Course content: The subject of Financial
	FINANCE)	Management consists of 7 chapters providing basic
	Credits: 3	knowledge on the following topics: financial
		principles and operating mechanism of private
		enterprises, financial statement analysis., risk &
		return theory and capital budgeting decisions.
		The topics covered in the program include:
		Overview of financial management
		• Financial statements and cash flow
		• Financial statement analysis
		• Time value of money
		• Risk and return
		• Criteria to evaluate the financial efficiency of
		investment projects
		• Cash flow estimation and project risk assessment
14	Course: ACCOUNTING	Course content:
	INFORMATION SYSTEM	This subject provides basic knowledge about
	Credits: 3	information systems, helps students systematize
		subjects in business administration, thereby
		organizing accounting information systems to
		control assets as well as provide financial services.
		promptly provide useful information to managers
		inside and outside the enterprise when making
		business decisions.
		The course begins with an introduction to the
		accounting information system in an enterprise, then
		describes the main business processes and control
		objectives in each process, and finally the criteria
		and basis for select and operate the accounting
		information system in the enterprise.
		Through the theory presented in class, combined
		with guided references, students will proceed to

			build one or more specific business processes in a
			business unit. These processes must be appropriate
			for scale, management requirements and must be
			feasible.
15	Course:	INTERNATIONAL	Course content: This course introduces the basic
	ACCOUNTING	<u>,</u>	concepts and standards of international accounting.
	Credits: 2		International accounting is the study of an entity that
			is reported to be a multinational company or an entity
			with reporting obligations to stakeholders located in
			a country other than the entity that is reported. A
			course with a detailed introduction to the
			convergence of US Generally Accepted Accounting
			Principles (GAAP) and International Financial
			Reporting Standards (IFRS). Some important
			concepts will be studied in detail, including:
			transaction analysis and recording, adjusting
			accounts, completing the accounting cycle,
			merchandise trading, inventory, accounts payable
			revenue, accounts payable, accounting information
			system and cash internal control. The course
			emphasizes the construction of financial statements -
			income statement, equity statement, balance sheet
			and cash flow statement - as well as their
			interpretation.
16	Course: RISK N	MANAGEMENT	Course content: Risk management is a very
	Credits: 3		necessary activity applied both in business and in
			daily life. Effective risk management will help
			businesses to proactively control losses and
			sometimes turn risks into business opportunities. The
			course "Risk Management" helps students have a
			general knowledge of risk management from risk
			identification, risk measurement, risk control, risk
			financing. If managers have the above knowledge,
			they not only find solutions to prevent, avoid and

		limit the damage caused by risks, but also turn risks
		into opportunities in some cases. Some of the main
		risks of enterprises such as: operational risk,
		financial risk, introduced in the course will help
		students understand more and have practical
		knowledge in risk management.
17	Course: VISITING BUSINESS FOR	Course content: The cousre helps students perceive
17	PRACTICE	the connection between theory and practice and
	Credits: 2	creates conditions for students to approach the reality
		of enterprises to practice, improve professional skills
		and initially familiarize themselves with future
		careers. It also helps students improve practical
		knowledge and soft skills (communication skills,
		handling situations, time management); Finally, it
		prepares students for necessary knowledge of the
		internships and jobs after graduation.
		During the time of the course, students both go to the
		bussiness and write the report. The student's process
		is assessed by the bussiness and the lecturers.
		Enterprises evaluate based on the student's process,
		the instructors assess students based on the content
		of their report, spirit and working attitude. The
		course assessment score consists of two components:
		the enterprise's assessment score (10%) and the
		instructor's assessment score about the report (90%).
18	Course: INTERNSHIP	Prerequisites: All the last year students or those
	Credits: 4	who have completed at least 100 credits of the
		program must do internships at enterprises and write
		reports, except students who are in the study
		retention or study suspension
		Course content: Internship is job practice, soft skills
		training, practice in the fields of financial
		accounting, management accounting, business
		analysis or auditing, computerization of accounting
		,

		work at a company in order to equip students with
		the skills of the accounting - auditing profession.
		Students can have internship at manufacturers,
		trading companies, service companies, construction
		companies or auditing companies. Students can
		choose topics in the field of financial accounting,
		management accounting, business operation
		analysis, auditing or accounting information system.
		During the internship, students have to learn, apply
		theoretical knowledge into practice, collect
		documents as the basis for writing internship report /
		graduation thesis. The internship report / graduation
		thesis must be assessed by the enteprise and
		submitted in accordance with the regulations of UEL
		and FAA.
	Elective courses	
1	Course: INTERNATIONAL	Course content: The course introduces students to
	PAYMENT	payment methods, means of payment, customs and
	Credits: 3	common documents used in international payment.
2	Course: BANKING	Course content: The course introduces the basic
	Credits: 3	knowledge and in-depth background of money, the
		process of issuing money and operating monetary
		policy of the central bank along with the operating
		principles of the banking system.
3	Course: INTERNATIONAL	Course content: The course introduces the
	FINACE	international financial market, financial instruments
	Credits: 3	in the international financial market, in-depth study
		of the foreign exchange market, the factors affecting
		the foreign exchange market. The course researches
		the theory of exchange rates, the factors affecting the
		exchange rate, the relationship between exchange
		rates and international trade. The course also
		researches the meaning of the international balance
		of payments, the factors affecting the balance of
1		

		normants the policies regulating the belance of
		payments, the policies regulating the balance of
		payments. The course also researches the theories of
		national debt, causes of national debt and solutions
		to solve national debt problems
4	Course: BANKING ACCOUNTING	Course content: The course includes the knowledge
	Credits: 3	of common banking operations in commercial banks
		such as capital mobilization, lending, payment via
		banks, foreign currency trading and international
		payments integrated into the knowledge of
		accounting work in commercial banks. The course
		shows the general principles when performing
		accounting work at commercial banks because each
		commercial bank has its own management software
		as well as accounting software.
6	Course: INTERNATIONAL	Prerequisite: International accounting
	FINANCIAL REPORTING	Course content: This course serves as a roadmap to
	STANDARDS (IFRS) (advanced	provide guidance and a path through the period of
	international accounting)	convergence of international reporting standards for
	Credits: 3	major students. It includes intensive IFRSs covering
		all important items of financial statements (FS):
		Presentation of FS (IAS 1), Cash flow statement
		(IAS 7), Inventory (IAS 2) and other speacial -
		issues as Conceptual Framework (Framework),
		Provisions and contingent assets, contingent
		liabilities (IAS 37), Non current assets held for sale
		and discontinued operations (IFRS 5), Accounting
		policies, estimates and errors (IAS 8) and Events
		after balance sheet date (IAS 10).
		The content of each chapter follows the same
		headings as used in the IASB statement: objective
		and scope, recognition, measurement, presentation
		and disclosures.
		Illustrations and tables are included to enhance
		students' understanding by a walkthrough of mini
		scenarios and exercises interspersed throughout the
		sectorises interspersed unoughout the

financial statements prepared under IFRS are also provided in each lecture. Course content: The Stock Market course consists of 4 chapters providing basic knowledge about the stock market. Students are equipped with basic
transactions in the operation of the Stock Market of core market participants. Regulations on securities trading and investment methods.
 Prerequisite: Management accounting Course contents: This course emphasizes the principles and techniques of strategic management for managing the resources and creating value. It focuses on the concepts and methods relevant to providing accounting and related data for management strategy and implementation, includes: Create a simple map to communicate strategic direction Understand the power of performance measurement in guiding strategy execution Gain a realistic view of what balanced scorecards can and cannot deliver. Design KPIs to align activity to strategy and encourage the right behaviour. Understand how to manage suppliers and customers and how to manage costs and quality of goods or services. Gain a view of sustainable development of the organization in adopting management accounting.

			mix.
9	Course:	PRACTICAL	Prerequisite: Principles of Accounting
	ACCOUNTING 1		Course content: The course content includes
	Credits: 3		knowledge about: organizing accounting procedures
			in enterprises, voucher systems, accounting journals
			and financial statements; preparing and completing
			accounting vouchers, recording accounting journals,
			presenting financial statements.
10	Course:	PRACTICAL	Prerequisites: Principles of Accounting
	ACCOUNTING 2		Course content: The main content of the course is
	Credits: 3		to provide students with knowledge related to
			methods of using accounting software, including:
			method of organizing accounting procedures for an
			organization that uses accounting software; methods
			of assigning tasks in accounting for businesses using
			accounting software; Methods of accounting for
			inventories, liabilities, fixed assets, cash, etc. for
			businesses using accounting software.
11	Course: DATABASE		Course content: The course presents the roles,
	Credits: 3		needs and methods of structured data management in
			enterprise information systems. The course
			introduces popular database models, delves into the
			presentation and analysis of the relational database
			model and its applications. After completing the
			course, learners will have the necessary skills and
			knowledge to fully implement the stages of the
			process of building a database to meet the needs of
			storing and exploiting information for management
			issues.
			The course consists of 4 parts:
			Part One: Introduction to database and relational
			database model, database building phases.

		Part Two: Using Structured Data Query Language –
		SQL in Database Administration and Information
		Mining.
		Part Three: Standardize databases, introduce
		standard forms, and provide solutions for database
		evaluation and optimization
		Part Four: Programming database mining software
		with C# in a 3-layer model.
6	Course: INTERNATIONAL	Prerequisite: International accounting
	FINANCIAL REPORTING	Course content: This course serves as a roadmap to
	STANDARDS (IFRS) (advanced	provide guidance and a path through the period of
	international accounting)	convergence of international reporting standards for
	Credits: 3	major students. It includes intensive IFRSs covering
		all important items of financial statements (FS):
		Presentation of FS (IAS 1), Cash flow statement
		(IAS 7), Inventory (IAS 2) and other speacial -
		issues as Conceptual Framework (Framework),
		Provisions and contingent assets, contingent
		liabilities (IAS 37), Non current assets held for sale
		and discontinued operations (IFRS 5), Accounting
		policies, estimates and errors (IAS 8) and Events
		after balance sheet date (IAS 10).
		The content of each chapter follows the same
		headings as used in the IASB statement: objective
		and scope, recognition, measurement, presentation
		and disclosures.
		Illustrations and tables are included to enhance
		students' understanding by a walkthrough of mini
		scenarios and exercises interspersed throughout the
		chapter. Short excerpts/note disclosures from actual
		financial statements prepared under IFRS are also
		provided in each lecture.

12	Course: ANALYSIS AND DESIGN	Course content: The course introduces the
	OF MANAGEMENT	knowledge of information system analysis and
	INFORMATION SYSTEM	design as well as equips students with the necessary
	Credits: 3	skills to be able to participate in the analysis and
		design of project which relating to develop specific
		information systems. The main topics of the course
		include:
		- Objectives and methods of surveying and
		determining requirements in the process of building
		and developing the management system.
		- Methods and tools used in system analysis and
		modeling.
		- Structured data modeling and processing
		techniques.
		- Techniques for analyzing and designing object-
		oriented systems using UML
		- (Unified Modeling Language)
		- Techniques and tools used in database design,
		system interface design.
13	Course: BUSINESS	Course content: This course helps students
	INTELLIGENCE AND SUPPORT	understand and be able to install, operate and exploit
	DECISION MAKING	Business Intelligences (BI) solutions. The
	Credits: 3	management of data and information and the
		production of statistics and reports plays a very
		important role for all units, organizations and
		especially businesses. The statistics reported in BI to
		provide intuitive, accurate, complete and timely
		information will help administrators in assessing,
		forecasting the situation, planning strategies as well
		as formulating policies. Business development plan
		in short and long term. The numbers and statistical
		forms are the most important basis for checking and
		evaluating the implementation of those plans,
		strategies and policies. Learning this subject will
		help students apply the series of previous subjects

Accounting, Finance and Management subjects to organize a system. BI supports better decision making in the enterprise based on data analysis inside and outside the business and this helps businesses gain a competitive advantage. In addition, this subject will help students practice data analysis skills, soft skills and attitudes in the future. 14 Course: DATA ANALYSIS WITH R/PYTHON Credits: 3 Course content: This course introduces the fundamentals of data analytics with python. It first reviews several most popular python libraries in data science, Numpy, Pandas, and Matplotlib. Then it focuses on basics of statistics concepts, time series analysis, and natural language processing. The course follows a streamline of data analytics projects with python as the tool. The course uses the hand-on approach, integrating the concepts of data analytics with python code examples. 15 Course: GRADUATION THESIS Course content: Students are allowed to write graduation thesis when they fully meet all of the following conditions: 18 Belongs to the group of 10% of students with the highest point average The cumulative GPA of the first 7 semesters is 7.0 or higher. 19 There is no credit debt by the time of consideration of eligibility criteria for making an audit. Report score of 8.0 or higher and assessed by teachers to be eligible for development to graduation thesis.			such as: Business Information Systems, Databases,

		Subject content: In self-study, students
		demonstrate in-depth research, research and
		application on a specific topic. Students can
		choose topics in the field of financial
		accounting, management accounting, business
		analysis, auditing, or accounting information
		systems or scientific research topics. Students
		write essays under the guidance of teachers.
		Students need to comply with the regulations of
		the teacher regarding the time-number of
		meetings, schedules and related work contents.
16	Course: INTEGRATING	Course content: The course consists of two parts.
	BUSINESS PROCESS WITH ERP	Part I: Introduction to basic concepts such as
	SYSTEMS (Module)	Organization, Enterprise, Business in the enterprise,
	Credits: 3	Enterprise management system and especially the
		concept of ERP (Enterprise Resource Planning).
		Presenting the processes, stages and issues raised in
		building & implementing ERP systems, the role of
		ERP in supporting business administration. In this
		section, students can access and practice with the
		ERP system that is considered to be the largest scale
		today, SAP ERP with the Dataset GBI2 package (this
		package contains the data of the Global Bike
		Incorporated sample business built by SAP to serve
		the training of ERP for universities which
		participating in the SAP UAP - University Alliances
		Program).
		Part II: Presenting standard SAP ERP modules and
		key business processes are Accounting
		(Accounting), Sales (Fulfillment), Purchasing
		(Procurement). Presenting the integration of these
		processes in an ERP system through Master data,
		cross-functionality between processes to create a
		unified business system. In this part, students
		practice on SAP ERP with a lot of real-world case
L		

			studies (provided by UAC) around GBI2 enterprise,
			a global enterprise, students are participate as an
			operational specialist in each department of GBI2
			enterprise.
17	Course:	CONSOLIDATED	Course content: The course content includes:
	FINANCIAL	STATEMENT	Introduction of the legal environment and
	(Module)		explanation of general terms; Determining economic
	Credits: 3		organization and controlling influence conditions;
			Purchase transaction analysis, goodwill accounting;
			Accounting for investments in associates and joint
			ventures; Process of data entry and data processing
			when making consolidated reports.
